EXPERIENCE

Kanzu Code Foundation, Kampala, Uganda — Software Engineer

SEPTEMBER 2022 - PRESENT

I developed several features for an in-house software application as requested by the project manager. I have gained several skills mostly interpersonal because it's very much teamwork oriented.

Earl Communications Limited, Kampala, Uganda — Software Developer

MAY 2018- PRESENT

I developed software products ranging from websites to mobile applications (mostly APIS). This exposed me to work on both big and small projects ranging from simple websites to platforms like e-commerce systems and the different permutations that come with them.

I hosted websites on servers via the CPANEL and configured them to make them live feeds.

Delivery Guy UG, Kampala, Uganda — Software Engineer

AUGUST 2020 - PRESENT

I developed new features and also fixed bugs on the current **delivery guy ug app** and dashboard. I was part of the team that developed and designed the app and the dashboard. My role then was to work on the dashboard both backend and frontend. I was also responsible for creating the APIS used on the mobile app.

I used CodeIgniter 3 for the backend and database configuration using MYSQL, and JQuery for validations, fetching notifications in real-time when orders are made and showing a graphical representation of sales.
